

LANDIRENZO®

CNG CONVERSION SYSTEMS

PRODUCTS OVERVIEW

COMPOSITION OF THE CNG SYSTEM

OMEGAS

THE SYSTEM MOST INSTALLED BY CAR MANUFACTURERS WORLDWIDE

TOP OF THE RANGE

✓ The mechanical components of the OMEGAS systems have been carefully selected to meet the stringent technical and quality specifications of car manufacturers, which is why they are our flagship products.

EASY SET UP

✓ The advanced algorithms for the assisted calibration of OMEGAS ECUs interact with system's cutting-edge components, allowing for quick, accurate and precise system set up. This means better vehicle handling and efficiency in all gas set ups.

MAXIMUM EFFICIENCY, LONG LIFE

✓ The OMEGAS systems have passed the strict Landireno validation protocols, such as endurance tests performed in line with the standards imposed by car manufacturers (about 500 million cycles).

QUALITY WITHOUT COMPROMISE

✓ All OMEGAS components undergo end-of-line tests in order to meet the automotive market's most stringent demands. This ensures maximum safety and reliability.

DIAGNOSTICS

✓ The OMEGAS ECUs interact with the vehicle's OBDII diagnostic system via the CAN protocol, providing accurate and effective calibration during set-up and advanced diagnostic strategies while running on gas.

EVO

THE BEST-SELLING SYSTEM IN THE WORLD

RIGHT PRICE

✓ The EVO systems are characterised by excellent value for money, an advantage that has promoted their success worldwide.

FOR EVERYONE

✓ The flexibility of the EVO range means that the system can be adapted to any light or heavy transport vehicle with any cubic capacity.

EASY INSTALLATION

✓ The components of the EVO systems are silent and compact, allowing for great ease of installation and use.

EFFICIENT AND RELIABLE

✓ The EVO systems provide the highest level of efficiency and reliability over time, ensuring excellent vehicle performance and utmost driving pleasure. This is why millions of motorists around the world have already chosen EVO.

DIAGNOSTICS

✓ The EVO range includes a version with OBDII connectivity for advanced gas system diagnostics.
