Press Release

Landi Renzo S.p.A. sponsors Jovanotti's "Safari" Tour

Landi Renzo S.p.A. is enthusiastically undertaking sponsorship of Jovanotti's "Safari" Tour, as the company shares the singer's focus on environmental issues.

With a market share of about 25%, Landi Renzo is a world leader in the field of LPG and natural gas vehicle components and systems listed on the star segment of the stock exchange since **June 26 2007**.

The "Safari Tour" will produce ZERO CO2 emissions. The amount of CO2 produced by each concert will be calculated and compensated with reforestation projects in the province hosting the concert. This is a project that has a practical value as well as a symbolic value, investigating new forms of conscious energy consumption, working toward a future in which preserving the ecological balance is obligatory for every country and every business.

Landi Renzo S.p.A. works constantly to promote awareness of environmental sustainability and believes that increasing awareness of this issue among the young is the key to ensuring an environmental future.

The company's affinity with Jovanotti's views on the environment made a partnership with the artist possible, or rather, "natural"!
